A. O. Smith reduces forecast for the fourth quarter 2008

Milwaukee, WI - A. O. Smith Corporation (NYSE: AOS) today indicated it expects fourth quarter results will be weaker than expected due to sluggish demand in both its water heater and electric motor businesses. As a result, the previously communicated 2008 forecast of \$2.80 to \$2.90 per share will likely not be achieved.

A decline in global construction and consumer spending, intensified by inventory reductions by the company's customers, has resulted in a significant drop in order volumes during the fourth quarter. The company responded with a decision to mitigate its inventory build throughout the quarter and aggressively curtailed production.

"The speed with which the market downturn confronted us is unprecedented," Paul Jones, chairman and chief executive officer, said. "However, with current orders less than historical replacement demand levels, we expect inventories will likely be replenished in early 2009."

"We are taking actions to further reduce costs and conserve cash in response to the market challenges. We are scrutinizing capital expenditures, maximizing working capital and reducing production schedules. We believe our financial strength gives us an advantage to navigate these challenging times."

The company now expects fourth quarter earnings to be between \$.15 and \$.25 per share. For the year, it expects earnings per share to be between \$2.63 and \$2.73.

A. O. Smith will broadcast a live conference call at 11:00 am (Eastern Time) today to discuss the fourth quarter forecast as well as other matters. The call can be heard on the company's website, www.aosmith.com.
